QUICK USE MANUAL FORDYS VR APP

In the initial menu choose new game. Enter name and age for this new game using the keyboard shown. Once these details have been filled in, choose to start the game. This will start the game. (In this version only 4 simultaneous saved games are allowed, once you have 4, if you want to add a game you must delete one of the previous ones from the load game menu).

Once in the ship we have to activate WIBU, which will give us instructions throughout the game of what to do. First we will get the motorcycle license from the ship. Once achieved we can choose from the screen of the ship the planets to go to. When a planet is completed, the next one is unlocked, in order.

On all planets we must complete the activities in order, looking for the activity screens that are unlocked as we complete activities. Once we have completed all the activities we can assemble the crystal of that planet and return to the ship, to continue the game with the next planet.

Once all the crystals of all the planets have been obtained, you can see how they come together and the game is over, the activities can be repeated with the game finished but it is advisable to start a new game.
